PROFESSIONAL SUMMARY

Software Engineer with 2.11 years of experience specializing in the React ecosystem. I've contributed to a wide range of live projects—working in roles such as support engineer, developer, and team lead. I'm a self-driven developer and a strong problem solver, known for taking ownership and delivering scalable, maintainable solutions.

EDUCATION

MAHARSHI DAYANAND UNIVERSITY

Bachelor of Technology in Computer Science

Rohtak, HR

Aug. 2018 – Jul 2022

G.R.M Memorial Senior Secondary Public School

Senior School Certificate

New Delhi, DL

May 2017

EXPERIENCE

Software Engineer

Jul. 2024 – Jul 2025

Sn Software Solution

Faridabad, HR

- Designed and developed full UI/UX from scratch for web (ReactJS) and mobile (React Native) apps based on Figma specifications
- Integrated REST APIs, improving data sync speed by 30 percent and reducing user-reported delays by 25 percent
- Led a team of 3 developers, conducted code reviews, and implemented CI/CD workflows to ensure on-time releases.
- Coordinated directly with clients and stakeholders to gather feedback and demonstrate product milestones.

Intern + Software Engineer

Sep 2022 – Jun 2024

Mobiloitte Technologies India Pvt Ltd

New Delhi, DL

- Figma-based designs were converted into functional, adaptive UIs for web and mobile platforms using React Native and ReactJS, respectively.
- Integrated REST APIs and managed state efficiently using Redux Toolkit and Context API
- Enhanced app reliability by identifying and fixing 50+ UI/UX bugs across platforms.
- Collaborated across teams and utilized Git for version control and codebase management.

PROJECTS

Rival Finance | *React, React Native, Redux Toolkit, Material-UI, Node Js, Aws*

- Created a digital finance app and admin system using modern UI libraries and **React tech stack**.
- Integrated Stripe** for secure money transactions and handled **KYC** with **third-party SDK**.
- Implemented **push notifications** using Firebase and managed application state with **Redux Toolkit**
- Collaborated** with **backend (Node.js)** and **design teams** to ensure feature alignment and **timely delivery**

Ponttual | *React Native, Redux Toolkit, Socket.io, Google Maps, Formik, Yup*

- Developed a **real-time ride-hailing app** (Uber/Rapido clone) for Android, iOS with **complete booking, tracking, and communication flows**.
- Implemented live tracking** using **Google Maps API**, with **driver and user sync** for **seamless route navigation**.
- Used Socket.io** to set up **real-time communication** between users, drivers, and admin.
- Built emergency and support systems** inside the app for **safer user experience**.
- Managed global app data** using **Redux** and **minimized app crashes significantly**.

Tawle | *React Native, React, Material-UI, Context Api, Javascript, Google Places API*

- Developed a **location-based restaurant reservation app** targeting **Android, iOS, and iPad** using **React Native**.
- Integrated **Google Maps** and **Places APIs** to offer personalized, real-time restaurant suggestions **based on user location**.
- Built an interactive booking system** with filters for time slots, party size, and food preferences.
- Added review and rating features**, increasing transparency and user-generated engagement.
- Responsive layouts** were designed and implemented using the **Context API** to provide for **lightweight and scalable state management**.

TECHNICAL SKILLS

Languages: JavaScript, HTML/CSS, TypeScript

Frameworks: React, React Native, RestAPI

Developer Tools: Git, VS Code, Visual Studio

Library: Redux Toolkit, Context API, Material-UI, React-Route, React-Native Navigation

CERTIFICATES

React JS Certificate : Udemy Certificate

Learn Spring boot in 100 step - Beginner to Expert : Infosys Springboard

Problem Solving (Basic) Certificate : HackerRank
